

PNEUMATIC 3.15mm FENCE BATTEN STAPLES

FEATURES

- 3.15mm Wire Diameter**
 Designed in New Zealand for rural batten and wire fence
 The 3.15mm staple is the industry standard for batten fencing
- 33mm Length**
 For increased holding power
- Divergent Point**
 Staple legs designed to spread as they are driven into timber battens to increase holding power
 Unlike barbed staples, divergent point staples part the timber fibres to minimize timber fibre damage and stops water tracking
- Paper Collated Staple**
 Durable collation, suitable for farm conditions
- Hot Dipped Galvanised**
 New Zealand manufactured for long life
- Radius Style head**
 The staple head moulds well over the wire offering increased holding power and provides the perfect fit
- High Carbon Content**
 Enhanced tensile strength for driving reliability

315
